Masters of Microsoft

PrintVis

The Microsoft-certified MIS built specifically for the print, packaging and label industry

Unlock Your Team's Potential with technology

PrintVis is a specialised ERP/MIS (Enterprise Resource Planning/Management Information System) solution designed for the print and packaging industry. It is an ERP/MIS solution designed to help printing companies manage their business operations efficiently.

The software covers a wide range of functionalities, including estimating, quoting, order processing, production planning, inventory management, scheduling, job tracking, cost analysis, and financial management. It is tailored to the unique needs of print and packaging businesses, making it easier for them to handle complex workflows, optimise production

processes, and improve overall productivity.

The Perfect Match for Any Print, Packaging or Label Company.

With PrintVis, printing companies can gain better control over their projects, streamline their operations, and enhance their ability to deliver high-quality products to clients on time. The software integrates with other business tools and systems, creating a unified platform that simplifies various aspects of print management.

WHY YOU WILL PrintVis

ESTIMATING AND QUOTING

Simplify and accelerate the estimation process, promote consistency, minimise errors, and provide critical financial insights for competitive pricing to win more orders.

PLANNING AND SCHEDULING

Empower users to efficiently manage the production process. Automate or manually schedule and view graphical presentations of machine capacities and production schedules.

CASE MANAGEMENT

A central hub for order administration, providing a complete view of cases and their status. It allows you to efficiently track jobs, designate responsible personnel at different stages, and have access to essential data, ensuring smooth order management.

INVOICING

This integration allows for efficient and accurate invoicing for jobs. The system gathers relevant information from the estimation, consumption, and job costing, create invoices with just a single click.

FINANCIAL MANAGEMENT

Powerful financial tools, include customisation options, rule setup, in-depth analysis, flexible reporting, and integrations with other essential software, helping to make informed decisions.

INVENTORY AND PURCHASING

This feature contributes to optimising inventory levels, reducing waste, and enhancing overall financial control in the print and packaging industry. It improves inventory management efficiency, offers flexible purchasing options, and simplifies the generation of purchase orders and invoices.

SHOP FLOOR MANAGEMENT

It ensures that the production team is equipped with the latest instructions and information, while also providing real-time updates on production orders and machine capacity, contributing to better production planning and execution.

What sets PrintVis apart?

Aside from the fact that PrintVis has now been in the market for over 20 years, undergoing constant development by highly skilled specialists from the print industry, probably the greatest asset you will gain by adopting PrintVis to help you run your business is the

strength and longevity of a certified Microsoft product, with all the familiarity and resilience you've come to know and trust from a company committed to driving business forward and improving manufacturing worldwide.

PrintVis for Label Production

The software provides full print-centric functionality to manage every aspect of the label production process, from initial quoting to job production and customer delivery. It also includes a robust financial package and business intelligence tools from Microsoft, available on-premises or in the cloud.

Key features and benefits for label manufacturers include:

- **Support for Various Printing Presses:** PrintVis caters to both long-repeat and short-custom runs on different types of printing presses, such as offset, digital, and flexography. It enables detailed materials management and the handling of complex variable data.
- **Die-Cutting and Tool Management:** The software offers powerful functionality to manage the various tools used in label printing, including kiss-cutting/die-cutting dies, cylinders, and adapters. Detailed information about tool compatibility with presses is stored, facilitating production optimisation and cost-effective estimates.
- **Comprehensive Die Setup:** PrintVis allows users to configure die setups with a wide range of possibilities, including cylinder size, punch thickness, shapes, and more. Different die statuses can be assigned, such as those stored in the archive or warehouse, helping streamline the ordering process.
- **Centralised Storage of Label Information:** Detailed information for each label, such as clichés/plates, colours, paper, dies, and finishing details like roll-up, folding, or cutting methods, is centrally stored. This ensures production security and minimises errors.
- **Quote to Invoice Management:** The software seamlessly manages label printing, whether it involves short custom digital runs or bulk factory runs, throughout the entire workflow, from quote to invoice. This end-to-end management is facilitated through an intelligent print management information system integrated into a proven ERP system, providing label printers with a single software solution for all aspects of their business.

In summary, PrintVis delivers a comprehensive solution designed to meet the specific needs of label manufacturers. With its robust features, detailed tool management, and centralised storage of label information, the software streamlines label production, enhances efficiency, and ensures accurate cost estimation, contributing to a profitable and innovative label printing operation.

PrinVis for Packaging

The software addresses the unique concerns of the packaging industry, such as waste reduction, cost management over raw materials, performance measurement, and maintaining a profitable and innovative operation.

Key features and benefits for packaging manufacturers include:

- **Packaging-Specific Concerns:** PrinVis understands the complexities involved in packaging production, including product engineering, legal safety requirements, aesthetics, shipping weights, environmentally friendly materials, tensile strengths, and more.
- **Quality Control and Insight:** The software provides control and insight into every stage of the production process, from estimating to pre-production and shop floor management, ensuring quality control and optimisation of operations.
- **Flexography Industry Fit:** PrinVis functionalities are well-suited for the flexography industry, commonly used for flexible packaging. The software allows users to decide on production quantities per machine and handle specific details related to relief plates (clichés), inks, and ink quantities.
- **Imposition and Die Setup:** PrinVis addresses the challenge of die imposition, allowing users to nest individual job items for efficient use of the substrate. The system provides options to upload images for imposition types, helping users visualise the sheet layout with nested job items accurately. Dies can also be set up in PrinVis to correspond with the imposition types, ensuring availability prior to production.
- **Estimation Specifics:** PrinVis caters to packaging-specific estimation processes, considering factors like material type, gluing areas, coating knockouts, and more. The software provides individual fields to specify gluing areas and other details, empowering users with control over jobs before they begin.

In summary, PrinVis offers packaging manufacturers a powerful solution to manage every aspect of their business efficiently. With features addressing packaging-specific concerns, quality control, imposition, die setup, and detailed estimation, PrinVis helps packaging companies optimise their operations, enhance profitability, and meet customer demands effectively.

Why Choose Us?

YOUR TRANSFORMATIONAL EXPERTS WITH 25 YEARS OF EXPERIENCE

We have been transforming the organisational landscape and enriching our customers' lives digitally for over 25 years, with more than 150 customers across the breadth of Africa benefiting from our services. We have selected the very best transformational tools and technologies that - together with our experience digitally - unleash the power of your existing and new technologies, and processes.

MOST EXPERIENCED MICROSOFT DYNAMICS COMPANY IN AFRICA

We have completed a host of projects; from full implementations and upgrades to advanced functionality, we have endured as the technology partner of choice with our clients.

PROUDLY SOUTH AFRICAN

Born and bred in South Africa, we understand the unique challenges of running a successful business in our country, and have developed software and services specifically tailored to our local market.

SUPPORT

Our team of experts are there to provide you and your team with the necessary training so that you can enjoy the full benefits of your new solution. Our support team will also be available 24/7/365 to ensure that you're always up and running.*

* Dependent on your requirements outlined in your SLA agreement.

About Braintree

Braintree have significant consulting and product capability, including Azure, Dynamics ERP, CRM, SharePoint, and Office 365. We are the largest Microsoft Dynamics company in Africa with over 25 years of successful implementations experience.
